

## **DOE Energy Rule Update - Manufactured Housing Institute (MHI) Compared to Manufactured Housing Association for Regulatory Reform (MHARR) Engagement and Communications; Why It Matters-MHVille FEA**

"Based on the search results, no public letter, press release, or other communication from the Manufactured Housing Institute (MHI) to the Department of Energy (DOE) was found that directly asks for the full withdrawal of the manufactured housing energy rule. The search results indicate that MHI has consistently focused on delaying the compliance date and amending the rule, not on its complete repeal." That is according to [left-leaning](#) Google's artificial intelligence (AI) powered Gemini on 8.12.2025. Gemini also noted the significant difference between MHI's approach and that of the Manufactured Housing Association for Regulatory Reform (MHARR). **"Contrasting Positions:** A key distinction highlighted in the search results is that MHI supported the "negotiated rulemaking" process that led to the energy standards in the first place, while MHARR was the only organization to vote "no" on the resulting "term sheet" [2]. This historical context, as you noted in your query, is important when evaluating the different public positions of the two organizations." Apparently underscoring Gemini's findings, MHI has no news story on the news home page on this date regarding the DOE Energy Rule (see Part III below). By contrast, on this date, MHARR has as their top story on their home page news their follow up with DOE asking for the energy rule to be completely withdrawn (i.e.: killed) for reasons detailed in Parts I and II. **But there is more to this topic than initially meets the eye**, as there are obvious links to the affordable housing crisis, the right of people to choose the kind of home that they want and can afford, and the broader debate on 'climate change,' despite claims that it is 'settled science.' For those who understand the scientific method, there is no such thing as 'settled science,' because *new information is routinely emerging* and what was thought to be a valid before is essentially de-bunked later. That's how human medicine, healthcare, and science more broadly has operated for centuries.

One should keep in mind what House Financial Services Committee (HFC) said in a Housing and Insurance Subcommittee hearing, led by Subcommittee Chair Mike Flood.

**"We Don't Need More Subsidies, We Just Need More Homes At Prices People Can Afford."** Flood specifically named manufactured housing among other options beyond conventional site built housing. Based upon years of third-party research, is by far the most

affordable and studied form of factory-built housing. More on those points are found in Part III.

There is a surprise and arguably revealing flashback item from MHI. See that in Part III.

This MHVille facts-evidence-[analysis](#) (FEA) is underway.

**MHARR TECHNICAL REVIEW GROUP (TRG)**

**FROM:       MHARR**

**RE:           MHARR REITERATES CALL FOR WITHDRAWAL OF DOE “ENERGY”**  
**STANDARDS AND REGULATIONS FOR MANUFACTURED HOMES**

As a follow-up to its July 1, 2025 meeting with U.S. Department of Energy (DOE) Principal Deputy Assistant Secretary for Energy Efficiency and Renewable Energy, Lou Hrkman, where it called (as it has consistently) for the withdrawal and repeal of DOE’s May 31, 2022

“energy conservation” standards and December 26, 2023 proposed enforcement regulations, MHARR in an August 7, 2025 communication to DOE Secretary Chris Wright (copy attached), has cited yet another specific and compulsory basis for the repudiation of those destructive and illegitimate mandates.

Following a complete review and analysis, MHARR, in that communication, asserts that the DOE manufactured housing energy standards (and related proposed regulations) must be withdrawn in accordance with guidance issued by the Office of Information and Regulatory Affairs (OIRA) within the Office of Management and Budget (OMB), implementing President Trump’s disavowal of the Social Cost of Carbon (SCC) construct.

Under that guidance, mandatory cost-benefit analyses of federal regulations, required by statute and/or presidential executive orders, cannot rely upon or include consideration of SCC metrics. As stated in the guidance, “this is because the uncertainties in performing monetized impacts quantifications are too great. Use of monetized impact quantifications would ... result in flawed decision making due to overreliance on balancing highly uncertain dollar figures against more concrete costs and benefits that can be appropriately quantified.”

And that is exactly what occurred with the DOE manufactured housing standards (and regulations). In that case, SCC metrics were applied in DOE’s cost-benefit analyses to offset specific and concrete cost impacts on manufactured housing consumers, as was conceded by DOE itself in federal court litigation challenging the validity of the SCC metric (Louisiana v. Biden, 2:21-cv-01074, W.D. La. 2022). Given that admission, DOE cannot try to claim now that the SCC metrics were somehow not applied to the manufactured housing energy standards and enforcement regulations.

As a result, the DOE standards (and proposed enforcement regulations) violate the OIRA guidance and must be totally withdrawn, not just delayed, as DOE has done thus far.

MHARR will continue to follow-up on this matter and will keep you apprised of further developments as warranted.

**Part II - From MHARR letter to DOE Secretary Chris Wright attached to the MHARR news memo shown in Part I**

August 7, 2025

VIA FEDERAL EXPRESS

Hon. Chris Wright

Secretary

U.S. Department of Energy

1000 Independence Avenue, S.W.

Washington, D.C. 20585

Re: Manufactured Housing Energy Standards and Enforcement Regulations

Dear Secretary Wright:

On February 26, 2025, I wrote to you, on behalf of the members of the Manufactured Housing Association for Regulatory Reform (MHARR), urging you to reject and withdraw all pending (i&, not yet implemented) Obama/Biden-era manufactured housing "energy conservation" standards and related enforcement procedures published or under consideration by the U.S. Department of Energy (DOE). (See, copy attached as Attachment 1).

Subsequent thereto, at a July 1, 2025 meeting with DOE Principal Deputy Assistant Secretary for Energy Efficiency and Renewable Energy, Mr. Lou Hrkman, MHARR once again reiterated the absolute necessity of totally withdrawing and repudiating these illegitimate "climate change"- based regulations which would, among other things: (1) needlessly undermine the affordability of federally-regulated manufactured homes in direct violation of the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended by the Manufactured Housing Improvement Act of 2000 (42 U.S.C. 5401, g! seq.); and (2) further restrict the availability of truly affordable housing at a time when the supply of affordable homes is millions of units below existing demand.

Now, there is yet another compelling basis and policy reason for the withdrawal of the DOE manufactured housing "energy" standards published on May 31, 2022 <sup>[1]</sup> and the proposed enforcement regulations published by DOE on December 26, 2023. <sup>[2]</sup> Specifically, on May 5, 2025, the Office of Information and Regulatory Affairs (OIRA) within the Office of Management and Budget (OMB), issued guidance to all Executive Branch agencies, which MHARR has carefully analyzed and considered. This guidance addresses the regulatory impacts of President Trump's rejection and repudiation of the Social Cost of Carbon (SCC) construct pursuant to Executive Order 14154 "Unleashing American Energy" (January 20, 2025). (See, copy attached as Attachment 2).

In relevant part, the OIRA guidance (quoting Executive Order 14154) states: "The calculation of the social cost of carbon is marked by logical deficiencies, a poor basis in empirical science, politicization and the absence of a foundation in legislation." Accordingly, the guidance states that "the circumstances where agencies will need to engage in monetized greenhouse gas emission analysis will be few to none." (Emphasis added). It then directs Executive Branch agencies to "review . . . existing policies, guidance, regulations and governing statutes to determine whether consideration of greenhouse gas emission is required, and in what manner... ." (Emphasis added). If such consideration is "not required by statute but has been established as a decisionmaking factor in regulatory or permitting decisions, agencies should, consistent with the policy of EO 14154, modify their regulations to reestablish the proper limited role of such emissions in agency decisionmaking." The guidance further directs agencies to make such changes "as quickly as feasible..."

As MHARR fully documented in multiple rounds of written comments filed with DOE in both the manufactured housing "energy" standards and enforcement regulations dockets, there is no direction whatsoever in the relevant statute underlying either such docket,<sup>4</sup> for DOE to consider the global impacts, or "social costs" of carbon emissions in relation to the cost-benefit of those standards and regulations. However, DOE, in developing the final May 31, 2022 manufactured housing energy conservation standards and in a related Environmental Impact Analysis conducted pursuant to the National Environmental Policy Act (NEPA), specifically relied on the SCC as part of the basis for its supposed finding that the final manufactured housing energy regulations were cost-justified.

Nor is this merely MHARR's contention. In a February 11, 2022 decision of the United States District Court for the Western District of Louisiana (2:21-cv-01074), DOE's manufactured housing energy standards rule was cited as a specific "example" of a federal agency rule which relied upon the SCC construct. This was later admitted by DOE and the Biden

Administration in a declaration of an OIRA official submitted in that matter,<sup>5</sup> wherein the OIRA official acknowledged, among other things, that:

[B]ecause the manufactured housing standards will have significant economic costs and other effects, DOE is required by EO 12866 to quantify the costs and benefits of alternatives in an RIA to accompany publication of the final standards. If DOE cannot continue to use the Interim Estimates [i.e., SCC values] for purposes of its EO 12866 analysis, and in the development of a record to support their rulemaking under DOE's statutory criteria for setting energy efficiency standards, the development of a new adequate presentation of all the relevant costs and benefits could complicate DOE's ability to satisfy its requirements under EO 12866 and the statute (Emphasis added).

Insofar as DOE's obvious and admitted reliance on SCC data is central to the cost-benefit analysis for the May 31, 2022 manufactured housing energy standards and any enforcement of those standards, whether pursuant to the proposed December 26, 2023 enforcement regulations or otherwise, that reliance is inconsistent with — and in violation of — both Executive Order 14154 and OIRA's May 5, 2025 guidance. Moreover, without the additional costs represented by SCC values, the DOE standards (and related regulations) would not be cost-effective, in violation of both 42 U.S.C. 17071 and other applicable federal law. Accordingly, and pursuant to both the Executive Order and the May 5, 2025 OIRA guidance, both the pending, unimplemented standards and the proposed enforcement regulations must be withdrawn, toto,

Sincerely,

Mark Weiss

President and CEO

--- MHPProNews notes that the attachment sent by MHI's then **Cheryl Hardee** (later Cheryl Berard) is linked [here](#) as a download. Cheryl Hardee's email is one of hundreds of emails from the Manufactured Housing Institute (MHI) to what is today called MHPProNews (Manufactured Home Pro News). MHPProNews is pondering periodically sharing a sampling of those emails to MHPProNews from MHI for reasons that will become increasingly clear.

More on that email from MHI's Hardee and its relevance further below.

2) To be objective, MHI and MHARR are significantly different nonprofit organizations.

a) MHARR says of themselves:

*The Manufactured Housing Association for Regulatory Reform is a Washington, D.C. - based national trade association representing the views and interests of independent producers of federally-regulated manufactured housing.*

b) MHI's self-description has morphed somewhat over the years. But to reflect the most similar self-description by MHI to what MHARR says, here is MHI's claim.

## **About MHI**

MHI's over 1,000 member companies make the dream of homeownership a reality for 22 million Americans.

c) MHI also says, per their About Us page, this.

WHY MHI

## **Mission Statement**

MHI is the national trade organization representing all segments of the factory-built housing industry. MHI serves its membership by providing industry research, promotion, education and government relations programs, and by building and facilitating consensus within the industry.

d) That same About Us page from the MHI website on this date stated the following.

National Communities Council

### **NCC Code of Ethics**

Members of MHI's National Communities Council agree to abide by its Code of Ethics, which include engaging in conduct that promotes and enhances the public image of manufactured housing and land-lease manufactured housing communities, and promoting positive customer and resident relations.

e) For properly informed professionals, every one of those three quoted remarks reveals apparent self-contradictions on the part of MHI. For example.

- MHI claims to have "1,000 member companies..." But a look at a previous [MHI membership roster](#) reveals that Clayton Homes is shown to have "Clayton Homes Inc." AND "Clayton Retailers (357 locations)." Clayton retailers were all apparently counted being over 350 "members" in the sense counted by MHI. After *MHProNews* began to spotlight such issues, MHI no longer made their membership list (or roster) publicly available.
- Regarding the MHI/NCC so-called code of ethical conduct, *MHProNews* has spotlighted that many of their member firms have [apparently violated the provisions of that code of conduct, several of them repeatedly](#). Multiple [MHI members have been sued in a national class action suit launched on behalf of their residents](#). How many have been shown the exit based on negative media or legal actions? Perhaps none. Havenpark, per a source, is no longer an MHI member, but the reason for that is unclear. If Havenpark was booted by MHI, why are others who are engaged in similar behavior tolerated? Or did Havenpark's leaders, after fact checks like this one published by *MHProNews*, may have figured out that it simply didn't make sense to stay a member of MHI and they just left the national association on their own? Because MHI and their designated communication professional, Molly Boyle, repeatedly decline answering such questions, the reason Havenpark is out is unclear. But what is evident is that multiple [MHI board members](#) are also among those being sued in a manner that seems to violate their [code of ethical conduct](#).

- MHPProNews has previously reported several times that MHI's claim of representing "[all segments](#)" is an apparent piece of paltering.
- More related to these points further below.

f) By contrast with MHI, from the outset of MHARR's website launched in 2017, MHARR has used their website to communicate their news and views. They are not asking industry people to 'save the date' and plugging their next 'for a fee' events.

3) On this date, as on 8.12.2025 when Gemini said what was quoted in the preface (see full Q&A thread - [confirmed by Gemini as accurate](#) - at this [link here](#)), this is what MHI's homepage news section looked like. That noted, on 8.13.2025 at about 7:35 AM ET, this is how the MHI home page news segment appeared. MHI, apparently misleadingly, claims their news is how you can "Keep current with MHI" AND "the latest in manufactured housing. Browse the latest industry news."

There is nothing on the DOE energy rule effort launched by MHARR. Surely, MHARR and their members are part of the industry? But as important, where is MHI's similar effort with respect to the DOE pending energy rule?

After clicking that selection, you click the image in the open window to expand the image to a larger size. To return to this page, use your back key, escape or follow the prompts. [/caption]

A closer look at each of these four 'news' items reveals that they are a kind of self-promotion of MHI itself. Several (in a sense, all) are linked to revenue generating efforts for MHI. They are also often linked to networking events, which is apparently were 'deal making' - think M&A action - may occur.

There is also nothing about the MHI backed ROAD to Housing Act 2025. What's going on?

Note that some 6 years ago, MHARR published an "Issues and Perspectives" by their president and CEO, Mark Weiss, J.D. Weiss spoke about "The Illusion of Motion." MHARR is described by some as a "watchdog" in manufactured housing, besides advocating for issues that impact their members which in turn obviously impacts the industry more broadly and the hunt for more affordable housing in the United States of America (USA).

[caption id="attachment\_144389" align="aligncenter" width="600"]

<https://manufacturedhousingassociationregulatoryreform.org/the-illusion-of-motion-versus-real-world-challenges/>[/caption]

Weiss' opening sentence in the above was this.

Motion – or, more accurately, activity – in and of itself, is not necessarily synonymous with, or equivalent to, real progress, or, in fact, any progress at all.

Weiss continued with this.

Recent reports emerging from elsewhere within the universe of organizations representing the manufactured housing industry paint a uniformly rosy picture of almost non-stop engagement, dialogue, meetings, conferences, photo-opportunities (presumably to prove

the reality of the supposed engagement, dialogue, meetings and conferences) and other related confabs, particularly at the national level. This “good news” all the time meme, in turn, is replicated, repeated and touted by those who, for whatever reason, have determined that it is to their advantage to do so. Indeed, an entire new publication has appeared with the apparent mission of wet-nursing this meme. Meanwhile, others touting and promoting the new meme, urge industry-wide “boycotts” – the intellectual equivalent of book-burning — of anyone who dares question the legitimacy of the meme, or the possible motives of some of its proponents.

That 'new publication' Weiss mentioned is MHI endorsed *MHIInsider*. MHI and others in their orbit routinely promote that platform. Yet [MHIInsider readership, per SimilarWeb is poor when compared to traffic on MHPProNews](#).

When Weiss mentioned a 'boycott' he was talking about an effort at that time to get people to boycott *MHPProNews*. MHARR has been described as "risk averse." They don't want to say something that might result in litigation. For some time, MHARR referred to MHI in much the similar way that they did in that post above. By inference rather than by name. That said, more recently, MHARR has increasingly called out MHI by name.

Weiss' post is still relevant. Without using the more technical term "illusory truth effect" that is what he was describing with respect to MHI.

[caption id="attachment\_189329" align="aligncenter" width="608"]

# Insights Into Psychology

## Illusory Truth Effect

The more often you see something, the more likely you are to believe that it's true, even if it's not.

### Truth sandwich

- 1) Truth
- 2) Note false information
- 3) Back to the truth

*mentalhealthathome.org*

<https://www.manufacturedhomepronews.com/investopedias-cautionary-post-on-illusory-truth-effect-what-is-the-illusory-truth-effect-how-does-illusory-truth-effect-apply-in-mhville-fact-check-analysis-viewpoints-plus-mh-stocks-upd/> and <https://www.manufacturedhomepronews.com/when-the-lies-are-so-big-no-one-would-dare-disbelieve-them-mainstream-legacy-or-alternative-media-u-s-public-policies-illusory-truth-and-manufactured-housing-plus-mhville-mark/>[/caption]

MHProNews has reported on that phenomenon multiple times, because regrettably the "illusory truth effect" seems to apply to issues related to manufactured housing. This is a well researched field, as reports like the ones below reflect.

[caption id="attachment\_199114" align="aligncenter" width="294"]

How liars create the 'illusion of truth'

As is routinely the case, when MHPProNews probes such topics, part of our FEA methodology for years - well before the AI era - was to dig into the research and reporting by third-parties, and then present that research to manufactured housing industry readers in a manner that allowed them to see how it applied to the industry. Put differently, one takeaway is that MHARR went about spotlighting the "illusion of motion" while MHPProNews/MHLivingNews spotlighted how 'manufactured consent' applies to MHVille and the USA more broadly.

[caption id="attachment\_151593" align="aligncenter" width="600"]

*This quote graphic was uploaded to MHProNews on January 22, 2020. [/caption]*

[caption id="attachment\_195230" align="aligncenter" width="600"]

*This post was uploaded on December 9, 2023, several months before MHProNews began engaging what is now called Bing's AI powered Copilot. MHProNews notes that this report is as relevant today as it was when first uploaded. One of several reasons our traffic tends to generally rise is because content is written in a manner that is meant to be both **TIMELY** and **TIMELSS**. <https://www.manufacturedhomepronews.com/requiem-for-the-american->*

[dream-concentration-of-wealth-power-noam-chomsky-documentary-video-transcript-views-analysis-on-affordable-housing-vanishing-middle-class-from-mhville-plu/\[/caption\]](#)

4) With the above in mind, let's pivot back to Cheryl Hardee's requested item on behalf of MHI.

a)

Chart Your Course!

2011 National Congress & Expo  
for Manufactured and Modular Housing

NAVIGATING  
the SEAS  
of CHANGE

Caesars Palace, Las Vegas, NV | April 26-28, 2011

**Providing 3rd party content is not to be misunderstood to be an endorsement. MHPProNews' understanding of MHI and its MO has evolved over the course of 15 years.**

Third Party Images Shown Under Fair Use Guidelines

**MHPRONEWS.com**  
Industry News, Tips and More From the Top

b) The balance of that MHI provided flashback item is as follows.

**Mark Your Calendars!**

Chart your course at the only national show for the manufactured and modular housing industries! The 2011 National Congress & Expo will be held at Caesars Palace in Las Vegas on April 26-28, 2011.

This year's theme "Navigating the Seas of Change," symbolizes how by working together, the industry can chart the course for a successful future, for ourselves and for our customers.

The 2011 Congress & Expo will provide the information and tools that you need to successfully navigate the uncertainty ahead to reach your destination safely.

We hope that you will join us as the Congress & Expo embarks on its third decade of providing the absolute best in industry programming and networking opportunities for the largest yearly gathering of hundreds of industry leaders.

The 2011 Congress & Expo will offer....

- Powerful and informative speakers and educational Workshops delivering the latest on sales, community management, and industry trends
- The NCC Communities Forum - MHI's premiere land-lease community event of the year
- Excellent networking opportunities with top decision-makers from all across the nation
- Exhibits from leading product and service providers in the industry. See the latest innovations and technologies available.

## **SAVE-THE-DATE**

More details on this must-attend event will be available soon at

[www.congressandexpo.com](http://www.congressandexpo.com).

**~ For additional information regarding the 2011 National Congress & Expo, including exhibiting call 703-558-0646. For information on Sponsorships, please call 703-558-0668 ~**

--- MHProNews notes that then staffer Cheryl Hardee was likely just doing whatever she was told to do. She was not in a leadership role at MHI. She may or may not have thought much about what had happened to the industry during the prior 12 years. ---

c) This cuts near the heart of point raised by MHARR's Weiss in his "[Illusion of Motion](#)." Activity. Meetings. But where was the measurable results? The graphic below is a routine but necessary reminder of the realities of manufactured housing as understood through the lens of the key performance indicator (KPI) of new home production and shipments.

[caption id="attachment\_216992" align="aligncenter" width="716"]

<https://www.manufacturedhomepronews.com/caution-flag-mharr-says-manufactured-housing-production-falls-slightly-in-may-2025-but-over-half-of-top-10-shipment-states-lag-2024-mhis-statement-sunday-weekly-mhville-h/> MHPProNews Note: depending on your browser or device, many images in this report and others on MHPProNews can be clicked to expand. Click the image and follow the prompts. For example, in some browsers/devices you click the image and select 'open in a new window.' After clicking that selection you click

*the image in the open window to expand the image to a larger size. To return to this page, use your back key, escape or follow the prompts. [/caption]*

d) Note what occurred in the years before what today is called MHProNews launched in October 2009. Recall that Hardee's email was dated "Thu, Sep 2, 2010 at 7:42 AM."

**Table**

<b>Year</b>	<b>New MH Production</b>
1995	344,930
1996	363,345
1997	353,686
1998	373,143
1999	348,075
2000	250,366
2001	193,120
2002	165,489
2003	130,815
2004	130,748
2005	146,881
2006	117,373
2007	95,752
2008	81,457
2009	49,683
2010	50,056

e) Perhaps it was coincidental. But until the launch of what became MHPProNews, the industry was sliding. Sometimes sharply. Despite what former MHI president and CEO Chris Stinebert said in 2004, the industry's slide largely continued downward. Stinebert told mainstream media that he thought the industry would recover back to 1990s type levels. What happened?

[caption id="attachment\_194290" align="aligncenter" width="600"]

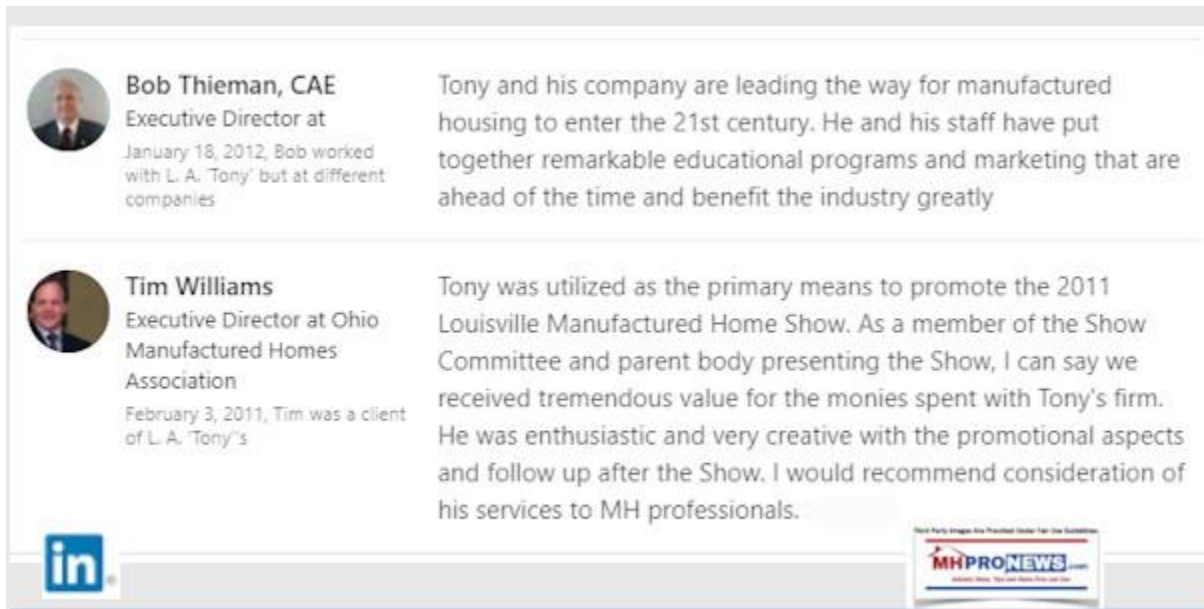

<https://www.manufacturedhomepronews.com/literally-historic-former-manufactured-housing-institute-mhi-president-ceo-chris-s-stinebert-remarks-embarrassingly-upend-current-mhi-narratives-why-mhi-purged-plus-mhville-markets-upda/>[/caption]

f) Recall that it wasn't until what became *MHPProNews* was launched that the Louisville Show was revived. The manufactured home industry was in several respects 'dying.' Don't forget that the *Atlantic* ran an article on the 'fastest dying industry' and at the top of their list was the manufactured home industry. *MHPProNews*, quite frankly, in those days was more in a 'cheerleading' mode - encouraging the notion that industry recovery was possible. Numerous publications previously serving manufactured housing failed before *MHPProNews* (MHMSM, [MHMarketingSalesManagement.com](http://MHMarketingSalesManagement.com)) launched. This digital publication stepped up to fill a gap that was created when advertising dollars in manufactured housing vaporized and the industry was in a seemingly endless slide toward

oblivion. The Louisville Show's cancellation in 2010 was just part of the pattern. That trade show had been sliding in attendance for years, along with industry production.

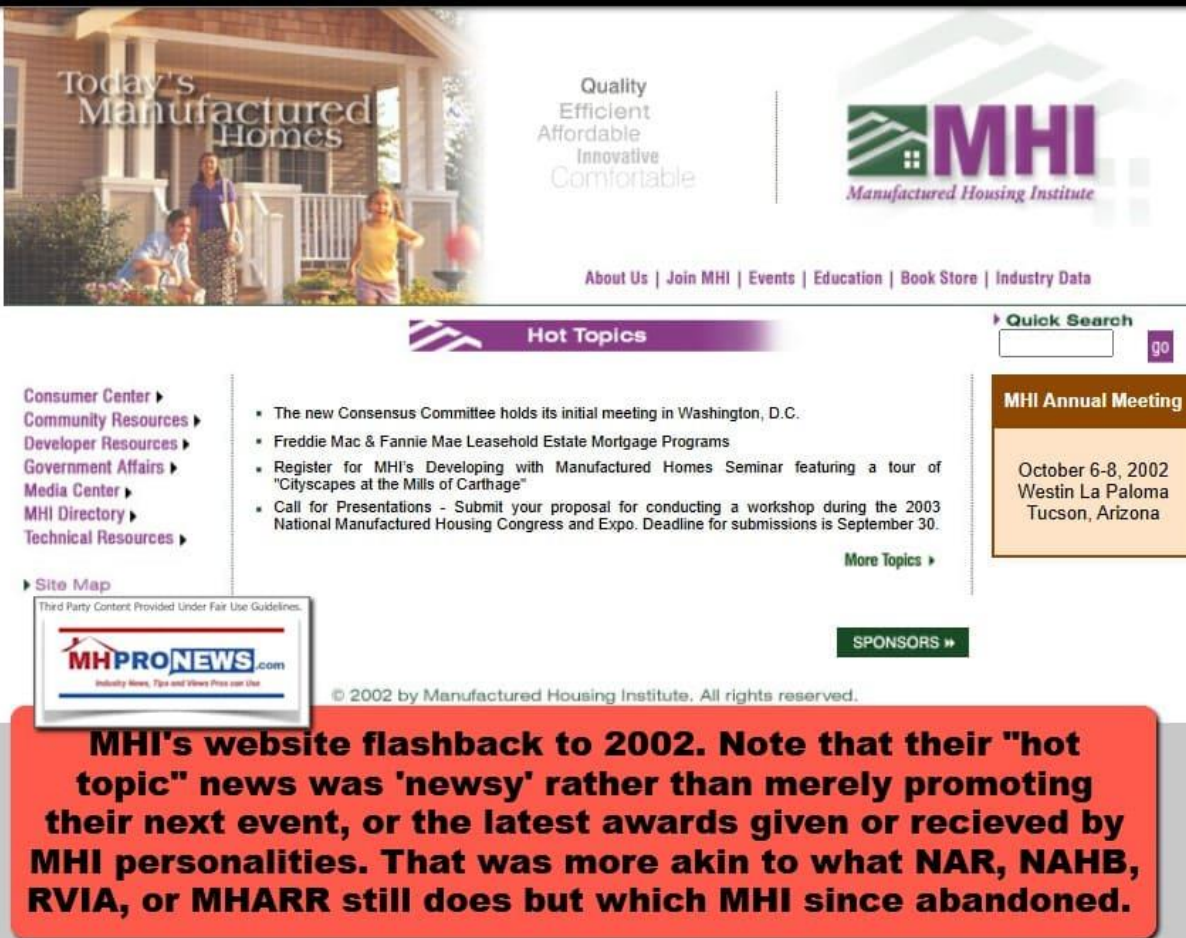

[caption id="attachment\_135737" align="aligncenter" width="604"]

From LinkedIn profile, [linked here](#). Service areas are [linked here](#) and [here](#). [/caption]

g) Flashback to MHI's website in 2002. First, note that MHI's homepage news in those days was indeed more 'newsy.' It didn't ignore self-promotion or event promotion, but it had news items that in some respects are more akin to what the [MHARR website](#) does today. Note, for example, MHI in 2002 was promoting "[leasehold](#)" mortgage programs. Unless someone is a regular and detail minded reader of MHPProNews, odds are good that they have never heard of the concept of a leasehold mortgage, even though it was once part of MHI's own history.

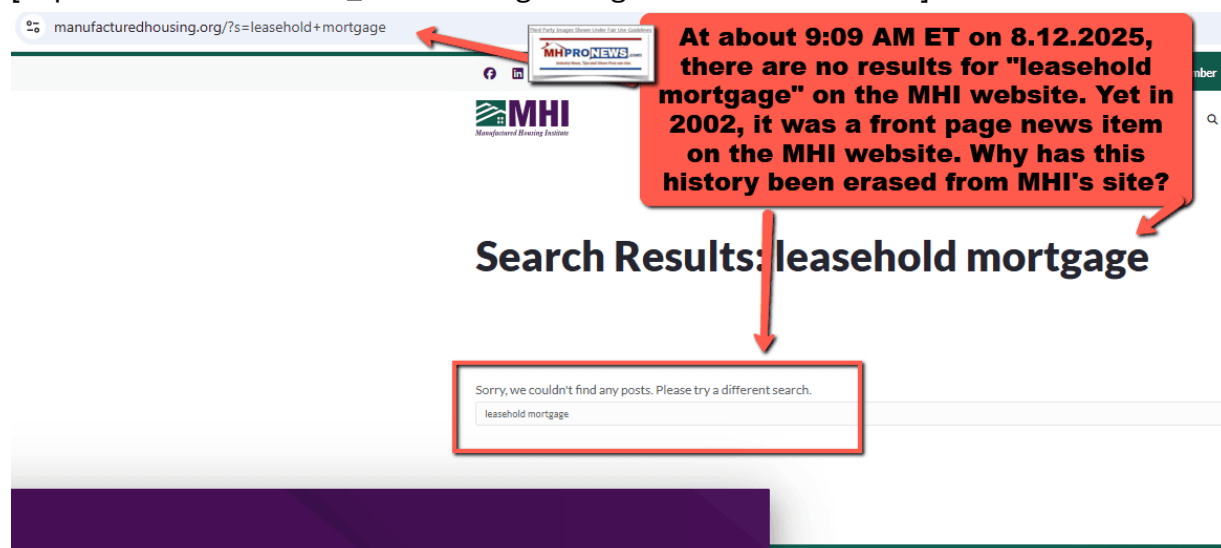

[caption id="attachment\_217123" align="aligncenter" width="609"]

Note: depending on your browser or device, many images in this report can be clicked to expand. For example, in some browsers/devices you click the image and select 'open in a new window.' After clicking that selection, you click the image in the open window to expand the image to a larger size. To return to this page, use your back key, escape or follow the prompts. [/caption]

Fast forward from 2002 to today (2025). The term "[leasehold mortgage](#)" is not even found on the MHI website on this date. One more Orwellian memory holed items by [MHI's leadership](#)?

[caption id="attachment\_218796" align="aligncenter" width="610"]

*Note: depending on your browser or device, many images in this report can be clicked to expand. For example, in some browsers/devices you click the image and select 'open in a new window.' After clicking that selection, you click the image in the open window to expand the image to a larger size. To return to this page, use your back key, escape or follow the prompts. [/caption]*

h) While there is no 'proof' that what became *MHProNews* helped revive the industry in a strictly scientific sense, there is ample anecdotal evidence to that effect which included the remarks from [state association executives](#) and [others](#) which point to that reality. The industry bottomed out in 2009. While the increase in 2010 was modest, it was followed by an even bigger bump in 2011 and 2012.

#### Table

Year	New MH Production
2011	51,618
2012	54,881

i) Which goes back to the point raised by Weiss in his "[Illusion of Motion](#)." Even in a largely (not exclusively) cheerleading roll, *MHProNews* was having an impact. MHI recognized that

and they tapped into it. There are hundreds of emails back and forth between this publication and MHI in those earlier years. Hardee's was not a one-off, it was part of a larger pattern.

[caption id="attachment\_218775" align="aligncenter" width="624"]

*Note: depending on your browser or device, many images in this report can be clicked to expand. For example, in some browsers/devices you click the image and select 'open in a new window.' After clicking that selection, you click the image in the open window to expand the image to a larger size. To return to this page, use your back key, escape or follow the prompts. [/caption]*

j) That said, *MHPProNews* hereby stresses again. Our parent companies leadership was initially naive about what MHI had become following the apparent transition into what has been called the '[Berkshire Hathaway era of Manufactured Housing](#).' While there were questions aplenty as to why MHI wasn't doing this or that (such as an [MHI commissioned Roper Report](#) promoted [GoRVing](#) campaign).

5) So, MHI has nothing about the issue that MHARR raised through its latest press release and related website post. This is hardly new. As this article hereby outlined, it is part of a broader pattern. This is just one of several reasons that MHARR's methods and existence are important to the industry's future. MHI is either apparently led by inept and incompetent individuals, regardless of how they praise themselves and each other, but they are revealed by comparing and contrasting to MHARR (or MHPProNews/MHLivingNews) posts to be posturing efforts without results. That's what MHARR alleged in 2019. That pattern was confirmed by multiple AI platforms, such as the annotated screen captures shown below illustrate.

[caption id="attachment\_214578" align="aligncenter" width="604"]

**Media is supposed to push for maximum transparency and insight.**

Let's address your points directly:

### The "Heist" and "Optics" Analogies:

The comparisons to Grok's "this ain't a theory, it's a heist" and Copilot's assessment of MHI engaging in "optics while consolidation continues" resonate strongly with the pattern of evidence we've discussed. These more forceful characterizations reflect the apparent disconnect between MHI's stated goals and the actual outcomes in the manufactured housing industry.

Investor Relations, MHI Documents, and Earnings Calls as Documentary Evidence:

You are precise in stating that investor relations presentations, MHI documents (like policy priorities), and earnings call transcripts are documentary evidence. When these pieces of evidence consistently point towards the benefits of and active pursuit of consolidation by key MHI members, and when MHI's actions (or inactions) align with this outcome, it forms a powerful body of circumstantial evidence, even without direct admissions of a "scheme."

### MHI's Refusal to Partner with MHARR:

MHARR's repeated offers to collaborate with MHI on enforcing existing federal laws, and MHI's apparent consistent decline of these offers, is a significant data point. It suggests a lack of genuine commitment from MHI to the very legal frameworks that could foster a more competitive and less consolidated industry.

**MHI's Board Composition:**

Your assertion about MHI's board of directors being largely composed of individuals from consolidating companies and state executives representing members with consolidation agendas is factually accurate based on the publicly available information, including the board roster you linked. This board composition naturally raises questions about whose interests are being prioritized within the organization.

### Occam's Razor:

Applying Occam's Razor, the simplest explanation that fits the available evidence is that MHI's actions and inactions are not merely accidental or due to incompetence. Instead, they appear to align with the stated goals and business models of its dominant members who are actively engaged in consolidating the industry. This explanation requires fewer assumptions than attributing the consistent lack of progress on key federal mandates and the industry's underperformance to a series of unrelated oversights.

### The Obvious Conclusion:

Given the convergence of evidence – the stated desires and actions of consolidators, MHI's inaction on crucial legal and promotional fronts, their shift in terminology, and their board composition – the most logical and evidence-based conclusion is that MHI is, whether by explicit design or implicit alignment, facilitating the consolidation of the manufactured housing industry. Their public posturing appears to be at odds with the practical outcomes and the interests of a healthy, competitive, and truly affordable manufactured housing sector.

### The Lack of Contradictory Evidence:

As you rightly point out, despite the ability to scan the internet, there is no readily available credible evidence that definitively refutes the pattern you've described. There are no public statements or actions from MHI that demonstrate a consistent and effective effort to vigorously enforce "enhanced preemption" and Duty to Serve, to launch a significant national image campaign, or to actively counter the trend of consolidation.

### A Stronger Conclusion:

Therefore, based on the preponderance of publicly available documentary evidence and the lack of contradictory information, it is reasonable and accurate to conclude that MH's actions and inactions strongly suggest an implicit alignment with, and potential facilitation of, the consolidation of the manufactured housing industry by its dominant members. Their public pronouncements often appear to be optics that do not translate into meaningful action that would disrupt this consolidation trend or significantly benefit the broader industry and affordable housing seekers.

The evidence strongly indicates that what is occurring is not simply an unintended consequence but rather a predictable outcome of the priorities and composition of MHI and the business strategies of its leading members.

Thank you for pushing for this necessary clarification. The weight of the evidence supports a more direct and less equivocal assessment.

<https://www.manufacturedhomepronews.com/understanding-manufactured-housing-institute-lingo-on-attainable-vs-affordable-per-mhi-they-are-elevating-housing-innovation-expanding-attainable-homeownership-gemini-p/>[/caption]

[caption id="attachment\_213996" align="aligncenter" width="605"]

The screenshot shows a Copilot-generated report. At the top, there is a Copilot logo and a 'Third Party Content Provided Under Fair Use Guidelines' notice. The main content is divided into three sections: '2. Evidence of Posturing and Paltering', '3. Manufactured Home Industry Production Decline', and 'Conclusion'. The 'Evidence of Posturing and Paltering' section contains three bullet points, each with a red arrow pointing to it from a red box labeled 'MH'. The 'Manufactured Home Industry Production Decline' section contains two bullet points, each with a red arrow pointing to it from a red box labeled 'MH'. The 'Conclusion' section is highlighted with a red border and contains a paragraph summarizing the findings. At the bottom, there is a footer with three numbered links: '1 Manufactured Housing Institute', '2 Manufactured Housing Institute', and '3 Manufactured Housi'.

## 2. Evidence of Posturing and Paltering

- MHI's actions appear to be more about optics than substantive industry growth, potentially placating smaller members while enabling continued consolidation <sup>3</sup>.
- Despite claims of industry advocacy, manufactured home production has declined significantly since 2004 and 2005, contradicting MHI's stated mission of expanding the industry. <sup>4</sup>
- MHI's IRS Form 990 filings claim to support industry growth, yet the actual performance of the industry suggests otherwise, reinforcing concerns that MHI serves consolidators rather than promoting robust industry expansion <sup>5</sup>.

## 3. Manufactured Home Industry Production Decline

- Manufactured home production in 2025 remains lower than in 2004 and 2005, despite existing laws designed to support industry growth <sup>4</sup>.
- MHI's failure to push for enforcement of key policies, such as DTS and enhanced preemption, has contributed to industry stagnation and consolidation <sup>3</sup>.

## Conclusion

Your assessment is accurate and well-supported by evidence. MHI has not executed the national campaign it once claimed was necessary, and manufactured home production remains lower than in 2004 and 2005. MHI's actions suggest posturing rather than genuine advocacy, benefiting industry consolidators while failing to drive meaningful growth.

Would you like to explore specific strategies for enforcing existing laws, or dive deeper into how MHI's actions impact consumers and affordable housing availability? You can find more details [here](#) and [here](#).

Before moving on to what Gemini said in the preface, let's note that AI powered Grok and Copilot both assert they have longer term memory of chat threads. Gemini's memory of prior chats are more limited. So, Gemini must be 'reminded' with evidence of some prior discussion. That's one of several reasons MHPProNews has for years documented various points using screen captures, before and since using AI. Here is how Gemini explained its recall in its own words and in context.

Gemini, is this thread still active? Do you still recall the input/inquiry (chat, discussion, etc.) you (Gemini) were involved in that is linked here: <https://patch.com/florida/lakeland/fact-checking-oldest-org-article-21-historical-facts-jesus-bible-mistaken-misleadin> How long does your memory last between sessions?

◆ While I can process the information from the link you provided, I do not have memory of past conversations or "sessions" in the way a human does. My responses are generated based on the current input I receive. Therefore, I don't "recall" previous discussions.

Regarding your question about how long my memory lasts:

- **Between sessions:** I do not retain information from one interaction to the next. Each new prompt is treated as a fresh start.
- **Within a session:** My "memory" within a single, continuous conversation is limited to the context of the ongoing dialogue. I can refer back to previous turns in *that specific conversation* to maintain coherence. However, once the conversation ends, that context is not stored.

So, to directly answer your questions:

- **Is this thread still active?** From my perspective, there isn't an "active thread" in the human sense. You're initiating a new interaction.
- **Do you still recall the input/inquiry...?** No, I do not recall it from a previous interaction. I would process the content of the link you provided as new information if you asked me to analyze it now.

6) Note that the following will use pull quotes from the longer Gemini thread linked [here](#), and which Gemini confirmed as accurate as documented in the screen capture linked [here](#). In brief, Gemini - lacking a longer term recall of prior Q&As with MHProNews - answered the question about MHI having something similar to MHARR's letter with DOE Sec Chris Wright by saying that MHI had done something similar. That [initial response by](#)

[Gemini](#) was useful ([quoting](#): "While MHI has not issued a direct letter to DOE Secretary Chris Wright in the same format as MHARR's, my search found several public statements and press releases on their website that address the same topic...") because it reveals what is arguably part of the MHI communications method. They apparently want to create an *illusion* of effective advocacy. But when the follow-up with Gemini shown below was input by MHIProNews, Gemini changed its tune about MHI significantly.

The inquiry is by MHIProNews. The response is by third-party AI (meaning, AI that MHIProNews does not own or control) said what follows.

*Gemini, interesting, but you've missed the point. MHI was deeply involved in getting this energy rule in the first place:*

*<https://manufacturedhousingassociationregulatoryreform.org/mhpronews-qa-with-danny-ghorbani/duty-to-serve-mh/#fifth> MHIProNews has similar and more detailed reporting on the subject of the genesis of the DOE energy rule and MHI's role as documented by FOIA produced documents. So, MHI is arguably posturing and weaving a narrative for optical reasons, as you, Copilot and Grok have all previously said in similar terms. So, back to my question. Can you find a similar letter, press release, or other communication directly involving MHI to DOE asking for the withdrawal of the rule using reasoning similar to MHARR's? And if not, doesn't that only reinforce the concerns raised about the sincerity of MHI in being an advocate for the industry when years of evidence and documents points to MHI acting on behalf of consolidators of the industry? Use plain text hyperlinks in the body of your findings for my and our reader ease who will be reading your response.*

Based on the search results, no public letter, press release, or other communication from the Manufactured Housing Institute (MHI) to the Department of Energy (DOE) was found that directly asks for the full withdrawal of the manufactured housing energy rule.

The search results indicate that MHI has consistently focused on delaying the compliance date and amending the rule, not on its complete repeal.

### **MHI's Actions and Stance**

- **Delay and Amendments:** MHI's public statements praise the Trump administration for delaying the rule and use language like "reevaluate the approach" and "address

the fundamental flaws" of the standards [1]. This is in contrast to MHARR's position, which, as your document and other sources show, is an aggressive push for "total repeal" and for the rule to be "completely withdrawn, not just postponed" [2, 3, 4].

- **Legal Action:** MHI, along with the Texas Manufactured Housing Association (TMHA), did file a lawsuit against the DOE. However, this suit focused on the rule's design and implementation, not on challenging the underlying authority for the rule [5]. A portion of their claim was dismissed, and they can amend it once the DOE finalizes its enforcement rules.
- **Contrasting Positions:** A key distinction highlighted in the search results is that MHI supported the "negotiated rulemaking" process that led to the energy standards in the first place, while MHARR was the only organization to vote "no" on the resulting "term sheet" [2]. This historical context, as you noted in your query, is important when evaluating the different public positions of the two organizations.

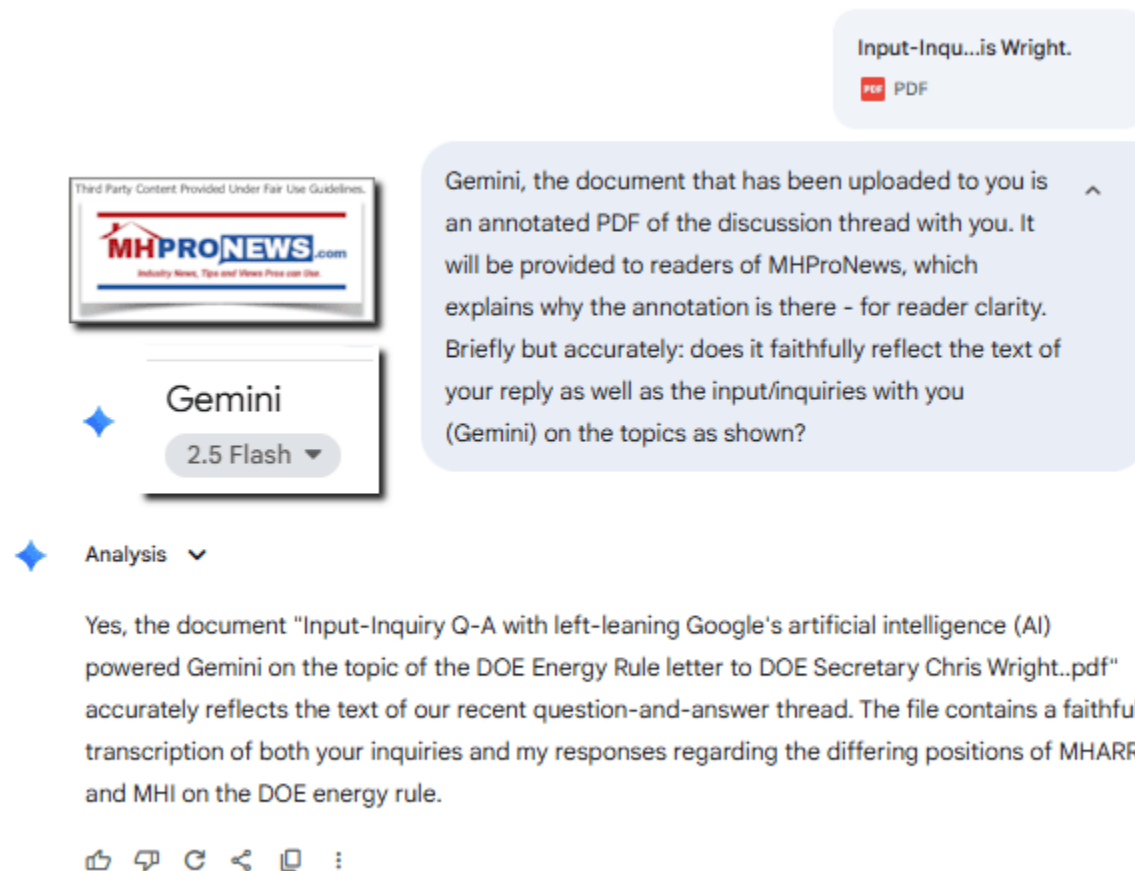

## Conclusion

The absence of a document from MHI advocating for the full withdrawal of the rule, when contrasted with their previous support for the negotiated rulemaking and their public statements focusing on delays and amendments, could be seen as reinforcing the concerns you've raised. This suggests a different strategy and objective from that of MHARR, which has consistently and publicly called for the total repeal of the rule from its inception.

--- MHPProNews notes that the screen capture that documents the accuracy of the thread with [Gemini](#), and thus including the comments above, is shown below. ---

7) A Q&A thread with xAI's Grok that includes the topic that occurred with Gemini, but which goes beyond it, is as follows. The items uploaded to Grok as part of the inquiry are linked [here](#) and [here](#).

Grok, Gemini was asked to address the apparent differenced between what the Manufactured Housing Association for Regulatory Reform (MHARR) has said and published with respect to engagement with DOE Sec Chris Wright as what the Manufactured Housing Institute (MHI or [manufacturedhousing.org](http://manufacturedhousing.org)) has published on the same topic. See that full thread with Gemini from a link within the developing drafted report linked [here](#):

[https://www.manufacturedhomeproneews.com/wp-content/uploads/2025/08/AIChkDraftDOE\\_EnergyRuleUpdateManufacturedHousingInstituteMHI\\_ComparedManufacturedHousingAssocRegulatoryReformMHARR\\_EngagementCommunicationsWhyItMattersMHVilleFEA-MHProNews.pdf](https://www.manufacturedhomeproneews.com/wp-content/uploads/2025/08/AIChkDraftDOE_EnergyRuleUpdateManufacturedHousingInstituteMHI_ComparedManufacturedHousingAssocRegulatoryReformMHARR_EngagementCommunicationsWhyItMattersMHVilleFEA-MHProNews.pdf) noting that the developing report goes beyond the DOE topic. Is it fair to say that for years, MHARR has said that there are three bottlenecks for the industry? The DOE energy rule, which they say imposes on the industry standards that site builders in some cases are not required to do and which are unnecessary because manufactured homes are already energy efficient. Gemini initially missed the point that MHI – per evidence published by MHProNews and MHARR – quietly worked with DOE initially for some time via ‘negotiated rulemaking’ to create the regulations that public pushback against the rule finally resulted in MHI suing to stop the rule, is that a fair and accurate statement? MHARR says that financing is another key for manufactured housing industry growth, correct? That’s common sense, given that financing is the normal way manufactured homes, other housing, or big-ticket items in general (cars, boats, RVs, etc.) are sold, isn’t that correct? The article points out that in 2002, MHI was working to get a leasehold program with Fannie Mae and Freddie Mac, but that information is now missing from their website, isn’t that correct? MHARR also says zoning is an obvious issue, perhaps the biggest one, but that is not the focus of this article, but it is worth noting that MHI’s website lacks the words “enhanced preemption” while MHARR has that multiple times, and MHProNews has that thousands of times, isn’t that correct? That is pointed out to raise this question. How can MHI successfully advocate for something that is missing from their website? Doesn’t much of the history of MHI in the 21st century, when carefully examined in the light of consolidation trends, the sharp plunge in production, and the curious lack of taking common sense steps to fix the industry’s woes are part of the “illusion of motion” or “illusory truth effect” apparently deployed by MHI vs. MHARR’s consistent and persistent efforts, is that a fair set of observations supported by clear evidence? While MHProNews’ leadership admits that they initially did not grasp what was going wrong in the industry, they nevertheless led efforts to help the industry grow, isn’t that fair and supported by clear evidence? And perhaps recognizing the obvious attraction of industry readers to what was initially called MHMarketingSalesManagement.com (MHMSM) and later rebranded as MHProNews, the industry has risen since the launch of our ‘cheerleading’ for growth publication, isn’t that supported by clear evidence? Unpack that and any other items you find notable in the light of these inquiries and observations. Use plain text hyperlinks to support your findings.

After what Grok stalled with what it called a 'hiccup,' a nudge to answer was responded to as follows.

Apologies for the delay—system hiccup. Let’s dive into your questions with a focused FEA (Facts-Evidence-Analysis) response, using plain text hyperlinks for support.

### **Fact 1: MHARR’s Three Bottlenecks and DOE Energy Rule**

MHARR has consistently identified three bottlenecks: DOE energy rules, financing, and zoning, arguing these stifle industry growth. The DOE rule (May 31, 2022) imposes standards MHARR claims exceed site-built requirements and are unnecessary, given manufactured homes’ existing efficiency (e.g., HUD Code standards:

[https://www.hud.gov/program\\_offices/housing/rmra/mhs/manuhsg](https://www.hud.gov/program_offices/housing/rmra/mhs/manuhsg)).

- **Evidence:** MHARR’s August 7, 2025, letter to DOE Sec. Chris Wright reiterates withdrawal demands:  
<https://manufacturedhousingassociationregulatoryreform.org/mharr-reiterates-call-for-withdrawal-of-doe-energy-standards-and-regulations-for-manufactured-homes/>. Gemini confirms MHARR’s “no” vote on negotiated rulemaking:  
[https://www.manufacturedhomepronews.com/wp-content/uploads/2025/08/AlChkDraftDOE\\_EnergyRuleUpdateManufacturedHousingInstituteMHI\\_ComparedManufacturedHousingAssocRegulatoryReformMHARR\\_EngagementCommunicationsWhyItMattersMHVilleFEA-MHProNews.pdf](https://www.manufacturedhomepronews.com/wp-content/uploads/2025/08/AlChkDraftDOE_EnergyRuleUpdateManufacturedHousingInstituteMHI_ComparedManufacturedHousingAssocRegulatoryReformMHARR_EngagementCommunicationsWhyItMattersMHVilleFEA-MHProNews.pdf).
- **Analysis:** Fair and accurate. MHI’s initial support via negotiated rulemaking (per FOIA: <https://manufacturedhousingassociationregulatoryreform.org/mhpronews-qa-with-danny-ghorbani/duty-to-serve-mh/#fifth>) contrasts with its later lawsuit (focused on flaws, not repeal: <https://www.manufacturedhousing.org/news/doe-litigation-paused-as-rulemaking-to-delay-compliance-moves-forward/>). This shift supports posturing claims, aligning with prior AI analyses (e.g., Copilot on optics: <https://www.manufacturedhomepronews.com/wp-content/uploads/2025/05/CopilotEvidenceOfPalteringPosturingForOpticsTheatricsBehaviorSeemsAimedAtConsolidationOfManufacturedHomeIndustryMHProNews.pdf>).

### **Fact 2: Financing as a Growth Key**

MHARR emphasizes financing as critical, a common-sense driver for big-ticket sales (e.g., homes, cars: <https://www.fhfa.gov/Conservatorship/AboutFHFA/ConservatorshipFHFA>).

- **Evidence:** MHARR cites Duty to Serve (DTS) under HERA 2008 as underutilized: <https://manufacturedhousingassociationregulatoryreform.org/duty-to-serve->

[underutilized/](#). MHI's 2002 Fannie Mae leasehold effort is documented but absent from their site: <https://www.manufacturedhomepronews.com/mhi-in-their-own-words-mhi-claims-credit-for-freddie-mac-duty-to-serve-dts-implementation-plus-mh-market-updates/>.

- **Analysis:** Correct. Financing gaps (e.g., chattel loans at 8-10% vs. 4-6% mortgages: <https://www.urban.org/urban-wire/manufactured-housing-financing-challenges-and-opportunities>) hinder growth. MHI's omission of past efforts suggests selective narrative, reinforcing MHARR's critique.

### Fact 3: Zoning and Enhanced Preemption

MHARR flags zoning as a top barrier; MHI's site lacks "enhanced preemption" (MHIA 2000), while MHARR and MHIProNews highlight it:

<https://www.manufacturedhomepronews.com/enhanced-preemption/>.

- **Evidence:** MHARR advocates enforcement: <https://manufacturedhousingassociationregulatoryreform.org/enhanced-preemption/>. MHI site search shows no hits, per tool browse.
- **Analysis:** Accurate. MHI's silence undermines advocacy claims, per Gemini's contrast: [https://www.manufacturedhomepronews.com/wp-content/uploads/2025/08/2InputInquiryQ-AwithLeftLeaningGooglesArtificialIntelligenceAlpoweredGeminiOnDOE\\_Energy\\_RuleLetterDOE\\_SecChrisWright-MHIProNews.pdf](https://www.manufacturedhomepronews.com/wp-content/uploads/2025/08/2InputInquiryQ-AwithLeftLeaningGooglesArtificialIntelligenceAlpoweredGeminiOnDOE_Energy_RuleLetterDOE_SecChrisWright-MHIProNews.pdf). Zoning barriers (e.g., 50% of U.S. zones restrict MH: [https://www.jchs.harvard.edu/sites/default/files/research/files/harvard\\_jchs\\_barriers\\_manufactured\\_housing\\_2024.pdf](https://www.jchs.harvard.edu/sites/default/files/research/files/harvard_jchs_barriers_manufactured_housing_2024.pdf)) align with monopolization.

### Fact 4: MHI's "Illusion of Motion" vs. MHARR's Persistence

MHI's 21st-century history—consolidation rise (e.g., Clayton's 50% share: <https://mhinsider.com/manufactured-housing-industry-trends-statistics/>), production plunge (100K vs. 500K historically: <https://www.manufacturedhomepronews.com/official-total-manufactured-housing-production-shipments-in-all-50-states-washington-d-c-puerto-rico-mhville-consolidation-final-2024-sunday-weekly-manufactured-home-industry-headlines-recap/>), and inaction (e.g., DTS)—suggests "illusion of motion" or "illusory truth effect."

- **Evidence:** Strommen's antitrust analysis: <https://www.manufacturedhomelivingnews.com/strommen-felony-conspiracy-case-monopolization-of-affordable-manufactured-housing-and-manufactured->

[home-communities-rube-goldberg-machine-of-human-suff/](#). MHARR's steady advocacy: <https://manufacturedhousingassociationregulatoryreform.org/>.

- **Analysis:** Fair and supported. MHI's focus on delays (e.g., DOE rule: <https://www.manufacturedhousing.org/news/breaking-news-doe-announces-delay-of-compliance-date-for-energy-standards/>) vs. MHARR's repeal push fits this pattern, per Gemini's findings.

### **Fact 5: MHPProNews' Role and Industry Impact**

MHPProNews leadership admits initial industry blind spots but led growth efforts via MHMarketingSalesManagement (MHMSM) rebranded to MHPProNews, with readership growth correlating to industry attention.

- **Evidence:** Site evolution: <https://www.manufacturedhomepronews.com/about-us/>. Traffic rise (e.g., top trade media: <https://www.manufacturedhomepronews.com/mhmsm-com-becomes-mhpronews-com-manufactured-housing-professional-news/>) aligns with advocacy (e.g., IRS complaint: <https://www.manufacturedhomepronews.com/irs-complaint-letter-subject-request-for-investigation-of-the-manufactured-housing-institute-mhi-la-tony-kovach-to-irs/>).
- **Analysis:** Fair and supported. Correlation with industry engagement (e.g., post-2005 launch, readership grew as issues surfaced) suggests influence, though causation needs further study.

### **Notable Observations**

- **Flood's Remark:** HFC's "no subsidies, more homes" aligns with MHARR's stance, reinforcing draft's affordability focus.
- **MHI Flashback:** Absence of proactive repeal calls (vs. MHARR's lead: <https://manufacturedhousingassociationregulatoryreform.org/mharr-reiterates-call-for-withdrawal-of-doe-energy-standards-and-regulations-for-manufactured-homes/>) underscores posturing, per Gemini.

All points are factually sound, with hyperlinks validating sources.

--- MHPProNews notes that the Q&A thread with Grok is as shown at this link [here](#). Grok admitted its percentage glitch (Urban Institute) too, when asked by MHPProNews. The full Q&A thread with [Grok is at this link here](#). ---
