

5) Per the data generated by Webalizer on the main (busiest) server for *MHProNews* is the following. Note that this is NOT our website's total traffic, as there are other over a dozen cPanels serving our website. But since this one server's totals dwarfs that of our primary self-proclaimed rivals, there is no reason to further embarrass them than to use the data from one cPanel vs. all of them. It also saves us time in doing segments of a report like this one. Obviously, there is almost a week of additional traffic yet to be tallied. Based on current trends, it would appear that From December 2023 to August 2025 the visits to our website appear to have roughly tripled. The page views recorded on the main cPanel from December 2023 to July 2025 has doubled. Note that the data was "**Generated 25-Aug-2025 07:23 CDT,**" per Webalizer. Meaning, there has been less than a third of the day recorded for data on 8.25.2025.
