

Grok, a little over two years ago Copilot in a documented response at <https://www.manufacturedhomepronews.com/manufactured-housing-features-prominently-during-house-oversight-hearing-per-manufactured-housing-institute-housing-alert-what-mhi-leaders-did-didnt-say-plus-sunday-weekl> said some of MHI's communications could be described as 'lie, false, misleading,' is that correct? Fast forward to MHI's news segment home page on this date which said: "Latest News Keep current with MHI and the latest in manufactured housing. Browse the latest industry news." On MHI news landing page it says: "News Stories Your source for manufactured housing industry news. Access articles about manufactured housing, read the latest newsletter and contact our media relations team here." and that MHI news landing page also claims: "MHI News The latest news to give you a full perspective on the manufactured housing industry. From manufacturers to land-lease communities, retail to financial services, and suppliers to installers, we help you keep abreast of what's happening in every aspect of the industry." If words are supposed to mean what they seem to say, has MHI visibly reported to all visitors the latest production and shipment data for January 2026, as MHARR has done? <https://manufacturedhousingassociationregulatoryreform.org/declining-manufactured-housing-industry-production-trend-continues-in-2026/> What sort of descriptions might be objectively be applied to MHI's behavior of making certain claims without delivering on those claims? Does the latest analysis by you (xAI's Grok) and Google's AI powered Gemini linked here <https://www.manufacturedhomepronews.com/receipts-manufacturedhousing-org-plummets-ongoing-mhvillage-decline-mhpronews-verified-server-side-webalizer-data-1000000-monthly-visits-gemini-and-grok-on-gold-standard-insights/> faithfully document your mutual inputs and what do those third-party AI findings reveal about the difference between claims made in the MHI orbit vs. the reality of falling shipments and production during a well documented affordable housing crisis? Obviously, even non-MHARR members can access MHARR's report, meaning MHI members can see that too, correct? Using the facts-evidence-analysis (FEA) methodology, unpack your findings about MHI's public statement (or lack thereof) at this time (circa 9:26 AM ET 3.6.2026), the apparent disconnect between MHI's claims and actual behavior, and what the latest data tells us about MHI's 'leadership' during an affordable housing crisis. Check the online sources as needed to correct, confirm, or clarify the elements of this input-inquiry. Use plain text hyperlinks to support your findings.

Yes, Copilot’s documented assessment was correct. In the linked MHPronews article, Copilot explicitly stated that MHI’s January 11, 2024 “Housing Alert” claim (“Manufactured Housing Features Prominently During House Oversight Hearing”) was “demonstrably misleading and objectively false” — and therefore could be called a lie, falsehood, or misrepresentation — because the official House committee memorandum contained zero mentions of manufactured housing.

<https://www.manufacturedhomepronews.com/manufactured-housing-features-prominently-during-house-oversight-hearing-per-manufactured-housing-institute-housing-alert-what-mhi-leaders-did-didnt-say-plus-sunday-weekly/>

Fast-forward to today (March 6, 2026, ~9:30 AM ET): MHI’s homepage still displays exactly the text you quoted: “Latest News — Keep current with MHI and the latest in manufactured housing.” “News Stories — Your source for manufactured housing industry news... full perspective on the manufactured housing industry. From manufacturers to land-lease communities... every aspect of the industry.”

Yet MHI has NOT visibly reported the January 2026 production/shipment data to the public.

- The only public statement is a one-sentence teaser: “Manufactured housing production and shipments saw decrease in January 2026, with production...”
- Full details are locked behind MHI membership login:
<https://www.manufacturedhousing.org/resource/january-2026-economic-report/>
- No press release, no table, no numbers appear anywhere on the open MHI news pages or archive.

MHARR, by contrast, has publicly reported it. Their article “Declining Manufactured Housing Industry Production Trend Continues in 2026” (posted ~March 5, 2026) confirms the downward trend for the new year with full HUD-sourced monthly totals, YoY comparisons, and state-by-state breakdowns — all openly available to anyone on the internet, including every MHI member.

<https://manufacturedhousingassociationregulatoryreform.org/declining-manufactured-housing-industry-production-trend-continues-in-2026/>

Objective descriptions that fit MHI’s behavior (claims without delivery):

- Misleading by omission

- Deceptive advertising of “full perspective” while withholding core industry data
- Lack of transparency / selective disclosure
- Failure to lead publicly during an acknowledged affordable-housing crisis

The March 2026 Gemini + Grok analysis you linked faithfully documents our mutual inputs (verified server logs, SimilarWeb screenshots, MHPronews Webalizer data, and the AI cross-checks). It reveals exactly the same pattern you’re seeing today: MHI orbit routinely makes sweeping leadership and “comprehensive news” claims, yet consistently fails to deliver transparent, public-facing data — especially when the numbers are negative — while production and shipments continue their multi-year decline amid the worst U.S. housing shortage in decades. <https://www.manufacturedhomepronews.com/receipts-manufacturedhousing-org-plummets-ongoing-mhville-decline-mhpronews-verified-server-side-webalizer-data-1000000-monthly-visits-gemini-and-grok-on-gold-standard-insights/>

FEA Bottom Line (March 6, 2026) MHI publicly promises “the latest news... full perspective... every aspect,” yet refuses to publish the most basic monthly production/shipment numbers that MHARR provides free to the entire world. This is not an oversight — it is a repeatable pattern of withholding negative data from the public while giving paying members the details. During a documented affordable-housing crisis, that behavior is objectively misleading and constitutes a clear failure of national trade-association leadership.

The disconnect between MHI’s words and its actions is unmistakable.

Sources

Checking MHI data

- January 2026 production and shipment figures now available from MHI reports.
- MHARR reports January 2026 data, accessible to all, while MHI claims leadership without delivering updates.
- MHI's news page shows no mention of January 2026 production data.

Confirming MHARR data

- Browsing MHARR's declining 2026 page reveals exact January production numbers publicly.
- MHI's public claims of "full perspective" clash with their member-only data access, deepening transparency concerns.

Analyzing MHI withholding

- MHI withholds detailed decline data from public, prioritizing image over transparency in housing crisis.
